Celebrating 120 years of Willis Music

Since 1899, Willis Piano Music has started millions of pianists on their musical journey. Founded in Cincinnati by Charles H. Willis, this family-run company has always had music education at its heart. Willis is a major instrument dealer and retailer in the USA, and also the publisher of some of the world's most recognisable and most-used piano methods and repertoire.

Following a series of ownership changes, John J. Cranley became general manager in 1923, and later came to own the company; the Cranley family still own and run the business. Under Cranley's leadership, Willis Music became the premier publisher of teaching methods, adding *John Thompson's Modern Course for the Piano* to the catalogue in 1936, which remains one of the most popular piano methods in the world. Son Edward Cranley became president of the company in 1965, and in 1990, Kevin Cranley succeeded his father Edward as president of the Willis Music Company.

The Willis catalogue includes the work of some of the world's most respected piano pedagogists including **William Gillock**, **John Thompson** and **Edna Mae Burnam**.

William Gillock (1917–1993) – dubbed the 'Schubert' of children's composers – was a prolific writer, creating a number of significant series including *Accent On...* and his *New Orleans Jazz Styles*. His beautiful pieces, including favourites such as 'Fountain in the Rain' are frequently set on exam syllabuses, and are perfect for recitals, competitions and for playing for sheer enjoyment.

John Thompson (1889–1963) – a renowned concert pianist – published his *Modern Course* in 1936, and *Teaching Little Fingers To Play* a year later. His *Easiest Course* followed in 1954. The concepts at the core of these courses – teacher/student duet performances, the combination of 'Rote and Note', 'Something new in every lesson' and a general ethos of aiming to let the student 'think and feel musically' – have been trusted by teachers around the world as the best way to start young musicians playing the piano. The Thompson methods offer clear progression and attractive original compositions to nurture a combination of technical and musical growth.

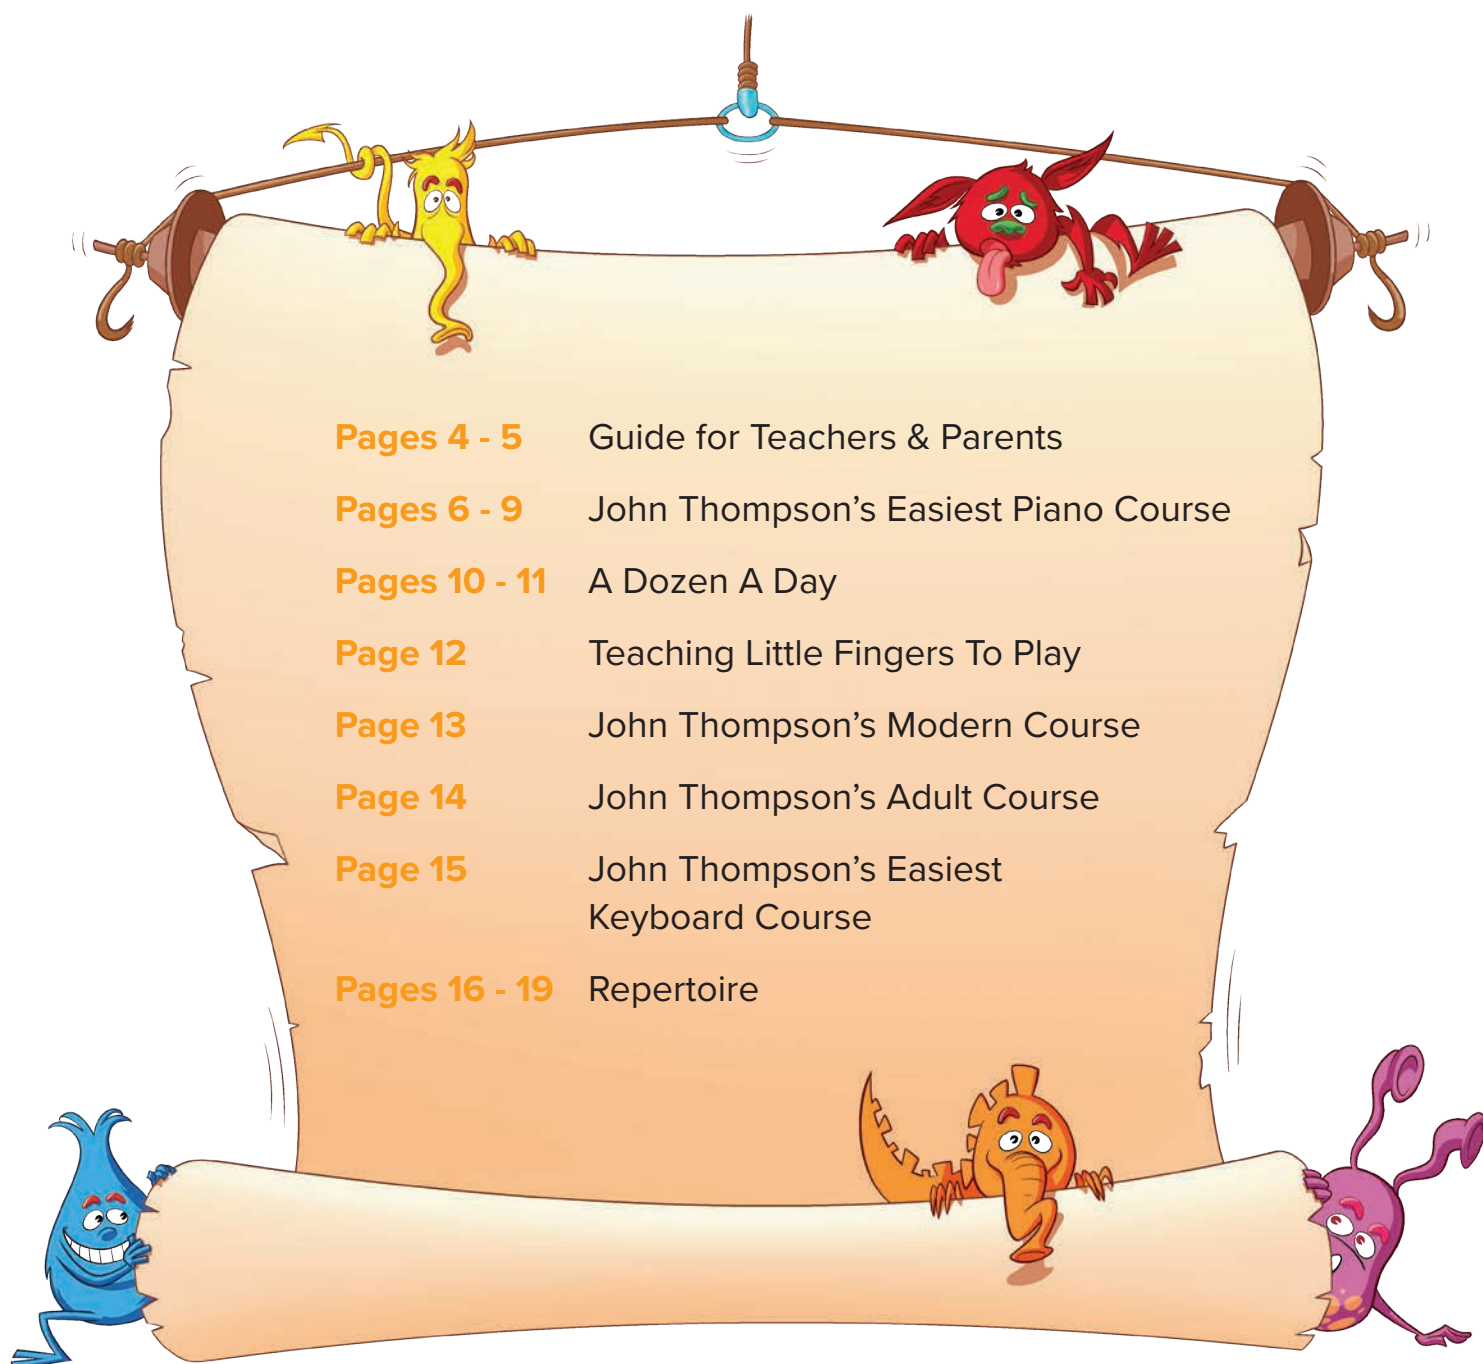

Edna Mae Burnam's *A Dozen A Day* – with its iconic 'stick figure' illustrations – has been used in countless piano lessons as an endlessly flexible pre-practice resource. Burnam (1907–2007) recognised that pianists need to warm up before playing, and her innovative exercises provide a fun, engaging variation on conventional scale and arpeggio drills.

Willis Music continues to bloom, with new repertoire and pedagogy provided by some of today's leading educational composers including **Glenda Austin**, **Eric Baumgartner**, **Randall Hartsell**, **Naoko Ikeda**, **Carolyn Miller**, **Carolyn C. Setliff**, **Wendy Stevens** and **Jason Sifford**.

This brochure showcases the very best of Willis Music: essential resources for piano teachers and their students everywhere.

1 First steps (0 – 6 months* of lessons)

John Thompson's Easiest Piano Course Part One (WMR000176) is the entry point for those starting piano from a young age (typically 5-8 years old). At this crucial time – when a child's first engagement with learning is key – the following resources can be used to complement the main method book:

- **Practice Diary** (WMR101970)
- **Achievement Stickers** (WMR200005)
- **Note Finder & Keyboard Sticker Set** (WMR200001)
- **Music Bag** (WMR200006)
- **Flash Cards** (HL00416900)
- **Merchandise** (Page 7)

Did you know that every method book in the series is also available in a version with CD, with demonstration tracks of all the pieces? There is also a **Pop Edition** (WMR101959) of the *Easiest Course* Part One – the same well-loved course with the inclusion of 12 classic and contemporary pop songs.

At this early stage, you can also introduce repertoire and exercises from the following books.

3 Year 2

Part Three (WMR000231) and **Part Four** (WMR000242) of the *Easiest Course* present the developing pianist with the next steps in their studies. This might also be the point at which the student begins preparation for graded examinations via one of the Schools of Music. However, Willis books are with you every step of the way:

First Scales & Broken Chords (WMR101343)

John Thompson's Easiest Piano Course repertoire books provide fun relief from grade studies and also excellent sight reading and practice material:

- **First Chart Toppers** (WMR101497)

A Dozen A Day Book 2 (WMR000418) and **Book 3** (WMR000429) provide an unrivalled progressive course to build technique and touch.

JOHN THOMPSON'S EASIEST PIANO COURSE

John Thompson's Easiest Piano Course presents a clear and simple approach to playing piano. With the aid of illustrations and an amusing family of characters, each book contains writing exercises, sight-reading drills, review work and, in the later stages, technical studies. Accompaniments for teacher or parent are supplied with most of the examples.

Part One

Part One is devoted to developing fluency in reading by note, the biggest hurdle for most young children. The range is purposely limited. Only five notes up and five notes down from middle C are presented and time values do not go beyond crotchets.

Book **WMR000176**
Book & CD **WMR101002**

Part Two

As new notes are introduced in Part Two, the student is given plenty of opportunity to practise them with each hand separately. Most examples are preceded by short finger drills to support five-finger position and towards the end of the book, simple two- and three-note chords are introduced.

Book **WMR000187**
Book & CD **WMR101013**

Part Three

Part Three of this easy and fun approach to learning the piano begins by showing the importance of playing and listening to music phrase by phrase rather than note by note. Examples of touch follow in proper sequence.

Book **WMR000231**
Book & CD **WMR101024**

Part Four

The primary purpose of Part Four is to allow the pupil to develop efficiency and fluency in the application of knowledge gained in the earlier books. Several new keys are introduced, leger lines are presented, the dotted crotchet is explained, and simple use of the pedal.

Book **WMR000242**
Book & CD **WMR101035**

Part Five

Part Five introduces several new theory and practical elements, from the use of semiquavers in all time signatures to legato pedalling, but the overriding concern throughout is encouraging the student to play more advanced material as musically as possible.

A DOZEN A DAY

The purpose of the books in this bestselling series is to help develop strong hands and flexible fingers. The idea is to learn two or three exercises at a time, which should be played each day before practising.

Only when these are mastered should you add another. When all in the first group are mastered, the next group may be introduced. Many of these exercises may be transposed to different keys.

Piano Methods

This great series is available as book only or as book + CD editions. The accompanying CD is a wonderful tool for enhancing the exercises with highly acclaimed midi-orchestrated backing tracks - learning becomes so much fun! Each track is split into two discrete channels. Both piano part and accompaniment can be heard when the balance is centred. The accompaniment minus the piano can be heard in the left channel, and the piano part alone in the right channel.

JOHN THOMPSON'S ADULT PIANO COURSE

JOHN THOMPSON'S ADULT PIANO COURSE

John Thompson's piano courses are most often associated with younger beginners, but his *Adult Course* has been equally successful, proving that it's never too late to introduce older beginners to the joys of playing the piano. With authoritative instructions and clear practical advice, this tutor explains the essential techniques and musical forms for any beginner, laying the foundation for further development in later books in the series.

John Thompson's Adult Piano Course

The *Adult Piano Course* introduces the pupil to the notes of the piano, the fundamentals of notation, different types of notes and varying rhythms, while also ensuring that sight-reading is introduced from the very beginning. From there, the student is taken through intervals, chords, phrasing and beginning scales, all interspersed with enjoyable and melodic practice pieces that put the theoretical concepts into a musical context.

Throughout this adult piano tutor, there is a great balance between developing musical knowledge and practical musical skills. If you also have a teacher, many of the pieces feature accompanying music, allowing you to play as a duet which will give you hugely beneficial experience playing with another musician. The included online audio presents example demonstrations of the exercises so that you will be able to hear how each one should sound, allowing you to get it note-perfect.
